

Enersave Plus (23-2.908kW)

High performance steel boilers, function on gas or liquid fuels

- ✓ Pressurized steel boiler for function on gas or liquid fuels;
- ✓ Cylindric boiler body, big fire chamber, improved heat exchanger surfaces, fire tubes with turbinators;
- ✓ Robust construction with quality control at every production step;
- ✓ High efficiency >91,5%;
- ✓ Exhaust gas temperature at chimney exit 210-220°C;
- ✓ Working temperature 3-4 bar. For bigger working pressure (max 6 bar), price is increased by 4% for every supplementary bar;
- ✓ Perfect compatibility with gas or oil burners Bentone or Riello;
- ✓ Tested and certified in conformity with standard EN-303 by ISCIR CERT (1798).

Enersave Plus

...keeps up with the requirements!

Control panel EN/1 for one-stage burner
Control panel EN/2 for two-stage burner

Modular-X (116-756kW)

Steel boiler Enersave modular, for assembly within the boiler room

...suitable for function with gas or liquid fuels

Steel boilers Enersave Modular-X are designed for spaces with reduced access, where it is not possible delivery of a normal boiler.

The boiler is delivered unassembled, for easy manipulation.

These boilers have the same function characteristics, working temperature and maximum pressure like the Enersave series.

The boiler assembly and welding must be performed by specialized personnel, after which a hydraulic pressure test and leakage control is obligatory.

All boiler components are included in the price, insulation and metal covers.

Price does not include assembly, welding and test operations.

*Bigger boilers on demand.

Modular-F (116-756kW)

Steel boiler Enersave modular delivered in halves

...suitable for function with gas or liquid fuels

Steel boilers Enersave Modular-X are designed for spaces with reduced access, where it is not possible delivery of a normal boiler.

Modular-F boilers are welded and tested Enersave boilers, and afterwards cut in half for delivery. The fire chamber is delivered uncut, as shown on the design.

These boilers have the same function characteristics, working temperature and maximum pressure like the Enersave series.

The boiler assembly and welding must be performed by specialized personnel, after which a hydraulic pressure test and leakage control is obligatory.

All boiler components are included in the price, insulation and metal covers.

Price does not include assembly, welding and test operations.
